Carlos

I spoke with Mr. Scott Stanush of LTRI and he stated that he had spoken to the team at the refinery and that there were no issues related to flooding. He stated that he would be traveling to the refinery tomorrow and would give me/Gary Moore a status update. I also requested that he copy Ms. Katie Delbecq on any emails that he sends to me or Gary.

Carlos

Would you like for me to follow up with them this morning. I received this last Friday and have not heard from the facility again.

Thank You,

Brian W. Mueller

Hello,

We have had no flooding or any other issues associated with the rain fall further north in Texas.

My team reported some rain from the passing storms, but nothing significant.

Thanks,
Scott

Good afternoon Jonathon

I am the Remedial Project Manager for the Falcon Refinery Site. EPA needs confirmation that the facility is secured for the ongoing flooding in your area. Please indicate the actions being taken to secure the facility to prevent a release of any product into the environment. Please reply back to me and Gary Moore about the status of the Site as soon as possible.

Thank You,

Brian W. Mueller
